EDUCATION

Computer Science
Bina Nusantara University

Binus University | Jakarta, Indonesia
Bachelor of Computer Science (S1 Ilmu Komputer) | Sept 2024 – Sept 2028 (Expected)

3.73 GPA

SKILLS

Languages & Tools:

- Programming:** Python, Java, C++, JavaScript, TypeScript, HTML5, CSS
- Web Development:** React, Next.js, Tailwind CSS
- Backend:** Supabase(PostgreSQL)
- AI:** PyTorch, OpenCV
- Tools:** Git, GitHub, Figma, VS Code

Softskills:

- Communication:** Active listening, written communication, and empathetic teamwork.
- Problem Solving & Management:** Critical analysis, task prioritization, and self-directed learning.
- Leadership:** Strategic task delegation based on team strengths.

About Me

I'm a 5th semester Computer Science student in Bina Nusantara University. I am currently interested in web development, creating useful apps for my freelance clients and also for university. I enjoy learning and growing my skills for my future career.

WORK & RESEARCH EXPERIENCE

Jan 2026 – present

Application Developer Freelance

- Designed and deployed custom full-stack web applications for local MSMEs (UMKMs) using React, Next.js, TypeScript, and Supabase, improving client online presence and inquiry conversion

Feb 2026 – June 2026

Research for University Project

- Engineered a facial emotion recognition pipeline using deep learning models (PyTorch/EfficientNet) to detect stress indicators, achieving high classification accuracy across merged FER datasets.

PROJECTS

Fun Mandarin | <https://www.funmandarin.id>

- Built a full-stack Mandarin LMS (Next.js, TypeScript, Supabase) with role-based auth, HSK courses, assignments, and a gamified typing trainer.

The Beauty Tailor | <https://www.thebeautytailor.id>

- Built a Next.js marketing site for a Jakarta bespoke tailor, covering services, gallery, and consultation booking. Implemented a serverless contact flow plus WhatsApp CTAs, with SEO and analytics. Stack: Next.js, React, TypeScript, Tailwind CSS.

VOLUNTEER & LEADERSHIP

Class Representative

Software Engineering Class

- Managed course communication, group coordination, and announcement distribution for Software Engineering cohort.

Teaching Volunteer

St. John School Meruya

- Designed and delivered interactive algorithmic logic workshops for primary school students using gamified learning modules.
